Ann,

Attached are a new set of avoided costs developed by the regional AESC group for use in DSM screening. I request the Board hold appropriate proceedings to formally adopt these avoided costs for measure screening. As in the past, the Department has invited the consultants to appear at a workshop to present and explain these avoided costs to interested participants. We anticipate doing a similar effort in this case.

Subject: Avoided Cost workshop

Rick Hornby can do either the 19th or 20th for a workshop. I have no preference.

Also, I am asking that the Board adopt the avoided costs which are included in the report in the attached spreadsheet titled "Appendix_B_20090820_rev(1a)" in the tab titled "VT". In addition, the Department recommends the adoption of the avoided costs for other fuels listed in Chapter 5 of the report as listed in Appendix E. At this time the Department is not proposing any changes to the externalities values included in the current screening analysis.

I want to talk to Vermont Gas about the gas costs (next week), so I have no recommendation at this time.
